Diphthera Immunization

To those who have not studied the matter, the question arises: Has the value of Toxoid treatment been demonstrated?"

Since 1922 certain of the cities in the State of New York have been actively encouraging Diphtheria Immunization. They are now reporting marked reductions in the prevalence of the disease and in some instances are showing a complete elimination of fatal cases.

In the City of Auburn, whose population is 37,000, the death rate from Diphtheria reached 48.3 per 100,000 in the year 1920. As the result of an intensive anti-diphtheritic campaign the Spring of 1924 saw 85 per cent of the school children and a large percentage of the pre-school children immunized against Diphtheria. Over two years have now elapsed and there have been no further deaths in Auburn from that disease.

During the first six months of this year, seventy-three rural communities in Alberta undertook the work of protecting their children against Diphtheria. A total of 2,586 were treated; but in most instances these communities had suffered from occasional epidemics of Diphtheria.

It is a great mistake to postpone action because the disease has not made a recent appearance, for in such places the degree of resistance is lower than in communities where the disease is common. Putting it in another way, we may say there are more susceptible children and probably, a greater degree of susceptibility in all the children. Again, in these days of rapid transit by automobile and train and the constant intercourse between communities it is a simple matter for a mild case or a Diphtheria carrier to start an epidemic in the midst of an unsuspecting and unprotected populace.

In some of the districts, only the children of school age were treated; that in itself is valuable, but it falls short of the desired objective. To eradicate Diphtheria we must immunize all the children. The pre-school child may perhaps be less exposed. The younger the child the more serious is the outlook of its taking Diphtheria and children from three months to six years are of an ideal age for receiving the immunizing treatment. There is very little disturbance in any child under 12 to 15 years, but even the mildest disturbance is exceedingly rare of children under school age. Therefore, in making your arrangements do not neglect the pre-school child.

OIL NOTES

IMPORTANT DEVELOPMENTS

Important developments in the oil fields of Alberta were recorded during the past week. In the test well being sunk by the Imperial Oil Company in the Bow Island gas field west of Medicine Hat, the company announces that cores taken from the well showed oil at three different levels and that the last core at 2,912 feet was encouraging. The oil appears to be of a medium gravity crude. The company's drillers on the Ribstone formation found strong oil showings in the cores taken at 1,880 feet.

During the week announcement was made also of the payment of the first dividend by the Royallite Company, which operates the well in the Turner Valley which brings in 15,000 barrels of gasoline monthly. The dividend was 25 cents a share or \$2.50 on the basis of the original shares.

There are now 35 strings of tools working in the Turner Valley, which shows the extent of the field.

FILING ON OIL LANDS NEAR EDGERTON

13,00 Acres Secured at Wallaby Lake by Syndicate

Over 13,000 acres of oil lands in the Wallaby Lake district, near Edgerton, were leased by the J. O. Williams syndicate recently, so it was learned last week. The filing was carried out at the Edmonton and Calgary land offices.

It appears that the Dominion government has reserved some 23,000 acres in this territory. Interests in California are also said to be interested in securing holdings there, as it is felt that there are good prospects for oil development.

Activity in the Wallaby Lake section is said to follow the reports as to the depth of the oil sands at Ribstone. It is believed by some oil men that there are good prospects for commercial wells in the Edgerton area, which is about half way between Wainwright and Ribstone fields and that is responsible for the filing.

Wells will be drilled in the new field without delay, says Mr. Williams who is returning to the scene of future operations.

For some days there have been rumours that Big Toronto financial interests are planning development in the eastern part of Alberta. It is expected that one of those mainly interested in new drilling operations will arrive in a few days.

When you need good tea or coffee ask for "Saker's 'Special' Blend."

Items of Interest

Born: To Mr. and Mrs. Hassell a daughter.

Messrs M. Parcels, D. W. Parcels, and J. Goodall, accompanied by Mesdames Parcels and Goodall left Saturday for the Red Deer district to join a moose hunting party.

Mrs. Varty, of Rimby, is spending a few weeks visiting her mother Mrs. Hass.

Mr. Matthieu, late of the local bank staff, spent the thanksgiving vacation with friends visiting in Chauvin.

Take Notice that the Movies will start at 8 o'clock next Monday so that the show can begin on time.

The Trail Rangers will meet on Friday evening in the basement of the Westminster church.

Harold Lloyd proved to be a great draw on Monday night, for despite the cold snap which has set in, visitors from Marsden, Sherlock Lake, Ribstone and other points in the district attended.

The Chauvin Flour Mill is again open for business.

Remember that the Sunday local train has been suspended till further notice. Last Sunday, Nov 7th being the last to run.

The Ribstone Basket Ball Girls are holding a dance in the Municipal Hall Ribstone Wednesday, November 17th. Admission \$1.00

Mr. Gish Principal of the Chauvin school spent the Thanksgiving vacation at his home in Strathecona.

Mr. E. Q. Stockton is busily engaged in drilling a well for Mr. J. Tooth and is now down over 200 feet.

Mr. Charski is succeeding Mr. A. Herbert as janitor of the local bank.

Mr. George Beattie is decorating and finishing Mrs. Saker's

CURLING MEETING

A meeting of the Chauvin Curling Club will be held in A. E. Keith's office on Tuesday, November 16th at 8.30 sharp. All members and others interested in curling are requested to attend. Let's get going early.

It is no joke. A full standard size case of fancy quality winter apples (every one a good keeper) at Saker's for only \$1.95

C.A.S. Seed Fair November 27th

RULES
GOVERNING SEED FAIR

1. All exhibitors must be members of Chauvin Agricultural Society.
2. In the case of wheat, oats, barley and rye, the exhibitor must have for sale, or be retaining for seed on his own farm, at least 50 bushels of wheat, oats, barley, and rye, 5 bushels of potatoes, 25 bushels of flax.
3. In classes 1 to 15 inclusive one bushel of seed shall be shown; in classes 13 to 14 one-half bushel. All exhibits of seed shall be held to be representative of the total quantity of such seed offered for sale by the exhibitor.
4. No premium shall be awarded on exhibits that contain impurities, in the opinion of the judges, are of noxious nature.
5. An exhibitor cannot make more than one entry in classes 1 to 24.
6. All samples of seed must be labelled, after judging, with the name and address of the exhibitor, the name of the variety, the amount of seed for sale, and selling price.
7. The committee in conjunction with the judges reserve the right to debar any exhibit on which, in their judgement, a prohibitive price is placed.
8. Any exhibitor making entry under any of the above classes thereby guarantees that his exhibit is a fair sample of the seed he has for sale and was grown on his own farm in 1926.
9. Before prizes are paid, each exhibitor will be required to certify that his exhibit strictly complies with regulation. In case of failure to do so the next in order will be awarded the prize.
10. In the event of less than three entries in any class, first or other prizes will only be awarded at the discretion of the judge.
11. The society will furnish crates in the Hall for hens.
12. Entry fee shall be ten per cent of amount of first prize.
13. Potatoes may be selected.
14. Persons entering registered seed must produce certificate of registration at the time of making entry.
15. All exhibits for competition for

Poppy Day

Armistice Day, November 11,

The objects of the Campaign are forefold.

Primarily it is to honor our fallen soldiers and show that we as citizens do not forget. This tribute is paid on this day in all nations of the Allies.

Secondly, the greater display of poppies means increased employment to our disabled soldiers in Alberta who make up these poppies. All poppies sold in Alberta by the Legion have been made in Alberta.

Thirdly Whatever organization acts for the Legion, can raise a fund which can only be used for local relief or charitable purposes.

Fourthly a small profit is made by the Legion which helps in a small measure the Legion's expense in handling the hundreds of adjustment cases of deserving disabled widows or dependents.

Our Short Story "The Adventures of the 'Moro'"

By W. J. Carlin

As a result of a long experience at sea I fully believe that ships are born, so to speak, under lucky or unlucky stars, just like human beings. Call it superstitious nonsense if you like, but that is my firm conviction.

By way of evidence let me tell you the odd story of the luck that followed a particular ship. I think you will agree, after hearing it, for more than coincidence theory is needed to fully account for it.

I was only a boy at the time—mess-room steward on a trunk-deck steamer which I will call the Moro. Before I start on my experience, however, I must hark back for a moment to the occasion of the Moro's launching, because she began her characteristic antics in her very cradle, so to speak before she took water at all.

Through somebody's miscalculation of distance, as she was gliding down the "ways," some projective object on her upper deck caught a scaffolding on which twenty men were at work, bringing the whole thing down with a crash. Two of the workmen were killed outright and all the others more or less seriously injured.

Not content with this auspicious start-off the steamer next ran into and sank her starboard tug, causing many thousands of pounds' damage through the consequent delay to the shipping in the river, for the sunken tug lay right across the fairway and no vessel of any size could proceed either up or down-stream until the wreck had been blown up. The Courts found the newly born Moro could not be held responsible for the damage, as she was not under her own power at the time of the accidents, and not as yet in charge of her owners. This saving luck attended her consistently afterwards, for whatever loss or danger her behaviour occasioned to others, she herself always came out of the legal tussles that resulted "right side up."

Then, on her maiden trip, she ran ashore in the Channel while outward bound, and two-thirds of her coal cargo had to be jettisoned to enable her to float off again, which she did with no damage at all to herself. Again the courts found that the stranding had occurred through "an act of God," and not through any fault of the master or shipowners; so the cargo insurance companies had to pay for the lost coal and look pleasant over it.

Next she had a mutiny aboard on the very same trip, and on her return home I joined her at Cardiff. Thus the Moro's second voyage was also my second voyage.

We went out to Japan with Welsh coal for the Navy, and having duly arrived there and discharged without any other incident than sinking some Chinese fishing-junks, without injury to ourselves, we were ordered to Java. All went well until we entered the Celebes Sea and were running down the east coast of Borneo.

About noon one Sunday the cape at the entrance to Macassar Straits was visible on the star-

board bow. In the opinion of the chief mate we were skirting the shore rather too closely, but the skipper was supposed to know what he was about, so the mate confined the expression of his views to only a chosen few; I happened to accidentally overhear his remarks.

The weather was typical of the Line in the Pacific—no wind, and a sea like molten glass.

"Everything in the garden's lovely," said one of the A.B.'s to his mate.

"Yes, rather too lovely to last—for the 'Moro'," replied the other. "She's up to mischief, I'll be bound."

And, sure enough, it was presently noticed that though the propeller was still churning away merrily the ship was making no headway through the water! We speedily discovered that she was hard and fast on the soft sand-and-mud bottom, having taken the ground so gently that no shock had been felt. The engines were at once stopped, of course, for every revolution was merely driving her deeper into the shoal.

The "full-astern" was tried for half an hour, with no result except to churn up the dark brown mixture of the sea-bottom all round the ship. It was only wasting steam and coal to no purpose, so once again the engines were stopped. The ballast tanks were pumped dry and soundings taken, which gave nine feet of water on the shore side (starboard) and two fathoms on the port.

The captain, who had a fondness for "cutting off corners" in order to save time, had certainly overdone it on this occasion, though in justice to him I should observe that the chart gave no indication of that particular shoal; the Moro, with her usual cussedness, had found it for herself.

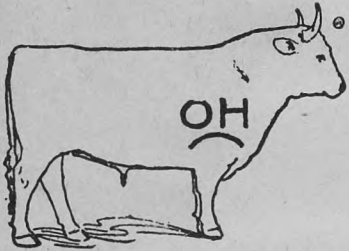

By four bells in the afternoon watch the ship had developed a pretty good list to starboard, bringing the water to within a couple of feet of the outside edge of the trunk-deck on that side.

There was nothing for it now but to sit down, more or less patiently, until some other ship hove in sight, to whose skipper we could signal for help in towing us off the shoal; or, alternatively until an extra high tide came to float us off. According to the Nautical Calendar one such high tide was due about midnight on the coming Tuesday, two days later.

Landwards we could see no sign of life or habitation. All we could make out in that direction were sandy beach in the foreground and jungle scrub a mile or so behind. So we settled down to wait either for a ship or a high tide and meanwhile the chief mate and one or two of the A.B.'s, who had had former experience of this part of the Pacific cheered us with blood-curdling accounts of other vessels which had gone ashore in these wild and lonely latitudes, and whose crews had been attacked at nightfall by Dyak pirates from the jungles, who ruthlessly butchered the stranded mariners and looted the vessel unless the sailors were numerous and well-armed enough.

Farm Notes

THE STORAGE OF VEGETABLES FOR WINTER USE

(Experimental Farms Note)

Each fall and winter a greater number of requests are received at the Scott Experimental Station for information regarding the storage of vegetables for use during the winter months.

The average prairie home has the dwelling where large quantities of perishable high priced vegetables may be stored. If a furnace is in the cellar it is advisable to partition off a store room to avoid excessive heat about the vegetables. A single thickness of lumber is sufficient for this partition. By opening a door into the store room the temperature may be raised during cold periods. When merely an earth pit temperature may be kept sufficiently high to protect from frost during severe weather by use of a lanterns or a single burner coal oil stove. For most vegetables a temperature ranging from 34 to 38 degrees F. is most favourable. Root crops such as carrots, parsnips, beets and turnips keep best when packed in moist sand. Cabbage and cauliflower require a circulation of air and are best piled not too deeply on slatted shelves so as to permit airing. Small numbers may be suspended from the ceiling by the roots. Celery is most successfully kept by placing upright in boxes and the roots covered with sand and kept moist. Onions should be thoroughly dried in the sun before storing and then tied in bundles and hung up where the air can circulate. Pumpkins and squash demand a high temperature (40 to 45 degrees F.) and dry atmosphere with free circulation of air and are usually difficult to store where other vegetables are kept. Potatoes are one of the earliest vegetables to store and are piled in bulk. The exclusion of sunlight prevents sprouting and the storing of whole sound tubers ensures very little waste from rotting provided the temperature is kept uniform, preferably around 38 degrees.

THE ART OF READING TOPOGRAPHIC MAPS

One of the basic requirements of our modern educational system is the teaching of the art of reading. With this accomplishment well mastered there is opened up to the pupil an avenue of pleasure, interest and profit extending to the limit of the span of life itself. How inestimable is the benefit to be derived from its exercise!

This art can lead us into every realm of human knowledge. One department that is forever offering its attractions to the reader is that which deals with localities, the location and extent of the natural and artificial features of a country. It is much easier to understand problems relating to any people, any district, or any locality when we understand the geographical features associated with them.

(Continued on page 7)

THE VALUE OF WAX

(Experimental Farm Note)

Wax is a valuable product of the hive too often allowed to go to waste in many apiaries. Pound for pound beeswax is more valuable than honey and the demand for this community is greater than the supply, therefore, it is to the advantage of every beekeeper to see that none is lost.

Wax is originally produced through certain glands is the bodies of the bees and is used by them for building comb and the capping over of brood and honey; therefore, every piece of comb taken from the hives and the cappings that are removed from the combs at extracting time, contain a certain amount of wax. In large apiaries, especially those run for extracted honey, the accumulation of cappings, broken or discarded combs, adventitious comb and scrapings from frames and hives may yield several hundred pounds of wax; while in smaller apiaries the amount may be comparatively small, yet enough to warrant the saving of it.

During the summer months when the bees are examined every nine or ten days and especially when there is a heavy honey flow on, it may be found necessary to remove from the hives small pieces of bridge or burr combs. These are usually thrown to the ground, which is not only a dangerous but a wasteful procedure. A solar wax extractor standing in one corner of the apiary or some container to receive these small pieces of wax until such time as they can be melted down, would add to the returns of the apiary. All broken or discarded combs and cappings never mind how small the amount will pay for the rendering. The present price of comb foundation should be incentive enough to save every particle of wax from the apiary.

BIRDS OF WESTERN CANADA

A volume of unusual public interest has just been issued by the Victoria Memorial Museum. This is a copiously illustrated work on the "Birds of Western Canada", by P. A. Taverner, ornithologist. It contains 380 pages of text matter, 314 text figures and 84 colored plates, and is larger and fuller than "The Birds of Eastern Canada", published a few years ago. It contains full descriptive matter for distinguishing different species of birds, notes on the nesting habits and distribution, and is crammed with interesting and vivid description setting forth the life histories and habits of the feathered creatures. The numerous illustrations are of the kind that illustrate, and many of the coloured plates are excellent reproductions of what in their class may be considered real works of art.

This volume should be in every school room of Western Canada. It is one that no student of natural history or bird lover in Canada can afford to be without.

It is sold in heavy paper covers at seventy-five cents, and can be had on application to the Director, Victoria Memorial Museum Ottawa.

FROM HERE & THERE

SACRED HEART CHURCH BAZAAR

A Bazaar will be held in the basement of the Sacred Heart church, Friday and Saturday, November 19th and 20th from 2 o'clock all through the afternoon and evening of each day.

All kinds of useful and fancy articles will be on sale, which will help to solve the problem of Christmas gifts. Lunches will be served during the time which the bazaar is open.

NOTICE TO THE PUBLIC

"C" Squad, 19th Alberta Dragoons and Chauvin Branch of G.W.V.A. invite everyone to attend the Armistice Day Memorial Service to be held in the I.O.O.F. hall Sunday afternoon, November 14th (time to be given later). Major Canon Caruthers Chaplain to 19th A. D. of Edmonton will officiate, assisted by Rev. Wetmore.

PROSPERITY U.F.A. TO HOLD ANNUAL CHICKEN DINNER AND DANCE

Color is being successfully used in treating illness in one London. The Annual U. F. A. Chicken Dinner and Dance will be held in the Prosperity school on Friday evening November 19th. Dinner will be served from 6.30 to 8.30 p.m., when the floor will be cleared for dancing.

Good floor and good music and three usual good time are assured. Price \$1.00 per plate for adults.

A Masquerade Dance will be held in Artland School on Friday November 19th. Unity 4 piece Orchestra will furnish the music. Good prizes. Single tickets \$1.00 Double \$1.50; Supper Provided. See Add. on page four of this issue.

MILITIA NOTES

Orders by Major J. A. MacKenzie, O.C. "C" Squadron.

The Squadron will Parade at the Armouries at 1.30 p.m. Sunday November 14th to attend divine Service. Dress, service, Swords will be worn by all ranks. Orderly Officer, Lt. H. W. Western.

Orderly Sgt. Sgt. G. M. Saul.
J. A. MacKenzie. Major

The R.W.I. will hold a social entertainment, and Sale of Work Nov. 19th at 8 p.m., two plays are being put on. Admission Adults 35 cents. Children over 12 years of age 15 cents. Come and see how father keeps house.

Appreciation of services rendered to the community in general is quite obvious by the large volume of business being done at Saker's. A few more businesses like this in our midst would certainly give us all a boost.

SPECIAL NOTICE

The Airlie Ladies Community Club will hold their Annual Sale of Work and Dance on the 10th of December 1926. Further particulars next week.

Saker's for service and full values.

SALE OF WORK AT BRADY SCHOOL

Thursday, November the 12th at Brady School will be the occasion of the Annual Sale of Work of the Manitou Lake Ladies Aid. A special invitation is extended to the returned men of the district. A real enjoyable time is assured. Admission 50c. Ladies please bring baskets, otherwise will be charged.

AIRLIE U.F.A.

A meeting of the Airlie U.F.A. was held in the schoolhouse Wednesday, November 3rd.

Meeting called to order by Pres. G. Gibb.

Minutes of previous meeting were read, and adopted on motion of W. J. Harris—P. Manson Moved Mrs. P. Manson—Mrs. G. Gibb that we hold a social evening once a month. Carried.

Mrs. P. Manson and Mrs. F. Cargill were appointed Social Committee.

Moved P. Manson—G. Gibb that we hold a social November 17th. Non-members to pay 25c admission. Carried.

Agreed that Ladies Community Club have use of cups, lamp etc on December 10th.

Moved W. J. Harris—P. Manson that meeting adjourn. Carried.

NOTES FROM KILLARNEY LAKE

Mox Kilpatrick is very enthusiastic about Ford Cars these days since he has purchased one.

Don't forget the Pie Social at Bull Creek school November 19th. Proceeds are to be devoted to the Christmas Tree fund.

The majority of grain in this district is being hauled to Hayter this fall.

Thanksgiving dinners were the order of the day here. Mrs. McEwen, Mrs. Merriman and Mrs. Skinner entertained jolly crowds.

The North End church held a Harvest Home last Sunday. The church was tastefully decorated with bountiful products from the field and garden.

ARTLAND ECHOES

Bessie Hodgson left for Vancouver Wednesday, November 3.

Mrs. A. W. Wright and son Alex went to Saskatoon Wednesday, returning Friday.

A Masquerade will be staged in the Artland school Friday, November 19th, Unity 4 piece Orchestra, Supper provided. Only a limited number of tickets obtainable at Wright's store, the Post Office or at A. E. Edwards' Marsden.

Miss Margaret Hull is attending Saskatoon this week.

V. W. Clark returned from Wilkie Monday.

Mr. Bobbie Bruce is visiting in the district.

A real busy corner just now is Saker's.

LECTURE ON ASTRONOMY

Chauvin and district will be given a rare opportunity on the night of November 18th, to hear a someone unique lecture on Astronomy.

This is being arranged by W. K. Gish, M.A., Principal of the Chauvin Schools. Every effort is being made to make this a delightful evening for all who may come. This somewhat difficult but extremely interesting subject will be presented in a manner that will bring some of the great astronomical facts within the grasp of those who may not have had the opportunity of making them a particular study.

Numerous large graphs and illustrations are being made and Mr. Gish is arranging with the University of Alberta for telescopic photographs which will be thrown on a screen.

This lecture will be worth hearing. The Admission will be worth fifty cents. Pupils twenty-five

Choice reserved seats are now on sale at Mr. McKechnie's Drug store. Anyone at a distance may reserve a seat until 7-45 p.m. by dropping Mr. Gish a line.

The lecture will be held in the Presbyterian Church and the proceeds are to be used for High School equipment.

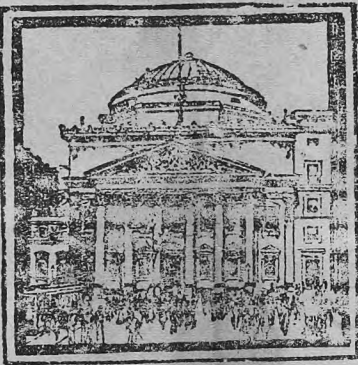

LIVESTOCK FOR CHICAGO FAIR

Two carloads of prize livestock will go forward from Alberta to the Chicago International this month. Under the auspices of the Department of Agriculture and University, some fine animals will go forward. O. A. Boggs of Daysland will have six head of Herefords; F. Collicut of Crossfield will have six head of Herefords; G. K. Allenby of Crossfield will have dairy shorthorns; Alex. Mitchell of Calgary will have a Holstein Bull, and W. P. Fleming will have a Hereford steer.

The University will send the following eight Aberdeen Angus, representing the herds of A. E. and E. A. Clemens, Sedgewick; Wm. Gibb, Killam; O. G. Granlin Stavel; G. Ellett, Stratheona, Vauxhall Stock Farms, Vauxhall; C. H. Richardson, Bowden, and two animals bred at the University. Five shorthorns including senior yearling from A. S. McDougall, Champion; one senior calf and two junior calves bred at the University. Three Herefords, a junior yearling from Parslow, Calgary; and two junior yearlings bred at the University. One crossbred senior calf at the crossbred heifer calf bred at the University.

There is also an exhibit of a small flock of Hampshire sheep for Toronto.

GERMAN AIRPLANES IN BIG WAR PICTURE

Aer Imported for Jetta Goudal's
"Her Man O' War"

Three German "pursuit" planes of the model used during the world war, were imported from France for use in Jetta Goudal's first starring picture, "Her Man O' War," which will be shown next Monday at Chauvin and Tuesday at Edgerton.

The particular kind of plane required for the scenes was the only kind not available in America. But no substitutes such as "bombers" or "scouts" of war-

Director Frank Urson, who declares that there are too many among theatre patrons who had the opportunity to watch Fritz perform in the air during the war to permit such license.

While the scenes in which the planes figure in the picture are brief, they are both thrilling and important, linking the hero, who poses as a deserter from the American ranks, but who actually is a spy, with his intelligence department by means of a unique signal system with the heroine's weekly wash. Comedy and tense drama figure in the incident. William Boyd, who makes an ideal doughboy, plays the role of the

spy, in company with his clowning "buddy," Jimmie Adams, of the Christie comedy fame.

Don't forget that the pictures will start at 8 p.m. next Monday evening, be on time and secure a good seat to see this famous picture.

A Danish factory is to make milk from vegetable fats, to which vitamins will be added to give the product the character of milk

A Scotsman, off on a business trip, called back as he was leaving the house:—

"Goodbye, all; and linna forget to tak' little Donald's glasses off when he isna' lookin' at anything."

"Look here, you borrowed a fiver from me a fortnight ago—said you were expecting some money from Scotland."

"Quite right, old man, but you know what Scotland is!"

Another little bit of "Saker" service!—Free storage of apples for the winter months to any customer.

DRY CLEANING AT HOME

Much of the finer dry cleaning done by professionals is accomplished by the simple mixture of gasoline and yellow, granulated corn meal. Often we acquire better results if we do the work ourselves. The cleaning should be done away from heat of any kind. Spread the garment to be cleaned on a hard, flat surface, saturate a piece of lintless cloth with gasoline; rub, until well covered, in a dish of corn meal and proceed to sponge the garment. Shake off and renew the corn meal as it becomes soiled, and re-soak the cloth in the gasoline. Then place the garment on a hanger and hang out of doors until the gasoline odor is gone. It will require no pressing. No rings or spots will be left on the garment when plenty of corn meal is used.

"The Adventures of the 'Moro'"

(Continued from page 2)

to beat them off.

"This" was pleasant hearing, considering that our crew numbered only twenty-three all told, and that the only firearms aboard were a small-bore sporting rifle belonging to the second engineer and half-a-dozen cheap German revolvers the "old man" had bought as a speculation and which, as it turned out later were more dangerous to the shooter than the shot-at.

However, the warnings had one good effect; they put us all on our guard. The skipper ordered the ordinary sea-watches to be kept, night and day, with strict injunctions to the watch on deck to maintain a keen look-out all round and to report immediately any signs of life ashore.

Nothing was seen during the day to alarm us, and when night came on a brilliant Pacific moon arose, giving splendid visibility. It would be about 10 p.m. when the lookout reported some movements on the beach about a mile away. All hands were soon aroused, and through the glasses we could see a crowd of figures making for the edge of the beach from the jungles. They appeared to be carrying some long objects, which were presently distinguished as canoes and rafts. Not a single light was to be seen anywhere amongst them and no sound could be heard. In a few minutes we counted nine of these canoes and rafts being launched into the water, some with half-a-dozen men aboard, others with with no splash of paddles and not three or four, and so on. They came steadily on towards the ship so much as a murmur of voices. Their intentions were clearly hostile.

Just to let them know we were not to be caught napping, the captain told the second engineer to fire his rifle over the heads of those in the nearest canoe. The Second did so, but evidently miscalculated the elevation, for his bullet hit the bow paddler of the leading canoe. He dropped his paddle, sprang upright, and then toppled backwards into the water.

This casualty checked the others for a brief spell; then, letting out a chorus of fierce yells, they all pulled at top speed towards our starboard trunk-deck, which offered easy access from boats or rafts, or even to a swimmer.

All hands but three were already down on the trunk-deck, ready to repel boarders and armed with all sorts of makeshift weapons. Of the three men left on the upper deck two were stationed at the bows, with long boathooks to be used as spears in case any of the Dyaks tried to throw ropes round the flukes of the anchors and climb aboard that way. The third man—the steward—was in the chart room, with the ship's medicine chest open, to supply bandages or other first aid to anyone who might get wounded in the coming "scrap." Down below on the trunk-deck the second engineer had his rifle ready. Unfortunately, however, it was only a single shot weapon. The six imitation revolvers had been distributed by the skipper between himself and the other officers, including the boatswain a Dane.

The latter fired his first round whilst the canoes were still about

sixty yards away, and immediately jumped back swearing in Danish and wringing his right hand. The wretched revolver had burst at the breech, badly damaging a couple of fingers!

This put an effective damper on our hopes of using the pistols for defensive purposes, and the whole six of them were promptly thrown up on to the upper deck, their wouldbe wielders taking to more reliable weapons, such as firebars, spare stanchions, and so on.

Your humble servant, remembering his earlier boyhood skill in dropping marauding crows with a sling and stones, had during the afternoon amused himself by manufacturing such a weapon from a piece of soft leather and a couple of lengths of fine wire. My ammunition was mainly made up heavy steel screw-nuts from one to three ounces in weight, stolen impartially from the carpenter's shop and the engine-room stores. I was all ready now for a modern version of the David and Goliath business, and felt tremendously important.

There was little or no fear of our being assailed on the port side, as the ship's list to starboard brought the port trunk-deck correspondingly high out of the water, making it almost impossible for anyone to get aboard on that side except by the aid of Jacob's ladders or hanging ropes. And you may be sure that we weren't hanging ladders or ropes over for the convenience of pirate's.

Very soon the canoe flotilla was within a few yards of the starboard side, despite two more shots from the rifle, which dropped another couple of the nearest attackers, though whether killed or only wounded we could not ascertain.

Then my sling had a look in. We were so awkwardly crowded on the trunk-deck, owing to the list and other factors preventing us taking up definite stations, that I had to keep dodging about and watching for chances to get in a shot without fear of laying out one of my own shipmates instead of a Dyak. Presently, however, I found such a chance, and picked out a man on one of the rafts about ten yards off. The heavy steel nut thudded hard on his temple, and in the bright moonlight we saw him collapse like a bag of grain to the deck of the raft; he never moved afterwards.

Cries of "Bravo, little 'un!" and "Good old Liverpool!" rewarded my first effort to emulate the Scripaual David.

I managed to get in another couple of my steel visiting cards with good effect before a shower of spears and arrows came whizzing about our ears, slightly injuring five of our men. One of them was the second engineer, whose forearm was pierced by a long bamboo spear just as he was about to shoot again. This caused him to drop his rifle, but it was at once picked up and fired by one of the sailors, and another pirate tumbled off his raft into the water.

By this time some of the canoes had got right alongside, and a dozen of their occupants essayed to obtain a footing on the trunk-deck. A foot or so of the whole length of its outside edge, how-

"The Adventures of she 'Moro'"

They gathered together in a

cluster about a hundred yards away, and then, after a parting volley of arrows, which hit nothing but the steel sides of the ship, they made for the beach, landed, and very shortly disappeared from sight into the jungle, canoes and all. The remainder of the night passed without disturbance, and all the next day we were severely alone. There was not a sign of anything alive on the shore, but nevertheless we made all preparations in case there should be another night attack.

While keeping an eye on the beach, we did not neglect the seaward horizon, but no ship hove in sight. The sounding-rods had been used regularly, and they assured us that the Moro was still tight below. She wasn't taking a single drop of water anywhere, and luckily the sea remained dead calm. About 4 p.m. in the afternoon it was noticed that the starboard trunk-deck edge was level with the water, though the ship's list had not increased. This could mean only one thing—that the depth of the water on the shoal was increasing. Another sounding showed two fathoms on the starboard side and two and a half on the port side. At this rate, if the tide continued to rise, we stood a good chance of being afloat by midnight or thereabouts. Steam had been kept up ready for emergency, and every few minutes the engines were worked half or full stern for a few minutes as a "feeler", but "Moro" still refused to move.

(To be concluded)

Just at the critical moment a stroke of bad luck befell us; we lost our one solitary firearm. The engineer's rifle so well had it knocked out of his hands by a heavy club thrown from one of the canoes; and it slithered swiftly down the sloping trunkdeck and flopped over the edge into the water.

"Never mind," shouted the skipper. "If we haven't got it they haven't either. Have at 'em, my lads!"

And we did "have at 'em" with renewed energy.

The pirates were now beginning to realize that their efforts to gain a footing on board the ship were costing them too heavy a price. One by one the canoes and rafts backed water and presently they had all pulled off to a safe distance, followed by my farewell messages of three-ounce steel as long as they were within sling-shot range.

THE ART OF READING TOPOGRAPHIC MAPS

(Continued from page 3)

That it is that we find interest in reading about such things. But there is another and much readier way of presenting this information. Although everyone, who is not illiterate, learns how to read the printed word, very many do not properly learn the art that relates to this other kind of reading, namely that of map-reading. This is all the more strange when it is considered that by the second method we can present much more adequately and completely than by the former the information relating to any country or district.

What may require pages of written or printed description can generally be shown even more clearly in a few square inches upon a map. It is surprising how interesting the mastery of this art of mapreading may become, or what pleasure and profit it may lead us into. This is particularly true when it is applied to the topographic map.

The art of reading topographic maps is quite simple to master, but there are certain basic points which should be understood. In order to present to the general public and to the school teacher, a brief course in reading topographic maps, the Topographical Survey Department of the Inter-small booklet "How to Read Topographic Maps." This is available to the public by writing to the Topographical Survey upon payment of the nominal sum of 5 cents.

This little booklet will be found

useful to the school teacher wishing to impart instruction in this art, or to the general public who wish to place themselves in a position to more fully appreciate the diversity of information shown upon these maps. In addition to a general discourse upon Canadian topographic maps, a number of examples are taken up and studied in detail.

Can't beat it—8 regular 5c lead pencils for two bits at
McKechnie's Drug Store

MORE NEW LAND UNDER PLOW

More new land has been broken this year in the province than for some years according to reports received. This holds out the prospect for a considerably increased acreage next year.

MORE LARGE YIELDS REPORTED

Reports of large wheat yields are the order of the day. From the 100 acre farm of Dr. McMillan near Granum, the report comes of an average of 60 bushels of Marquis on Summer-fallowed land.

GETS IMPORTANT POST

Mr. Leonard D. Nesbitt former editor of the Bassano Mail, and former president of the Alberta Weekly Newspapers Association has been appointed Publicity Agent for the Alberta Wheat Pool. Mr. Andrew Cairns, of the University of Minnesota, is to head the new educational department of the Wheat Pool.

First Aid Champions of C.P.R. Lines

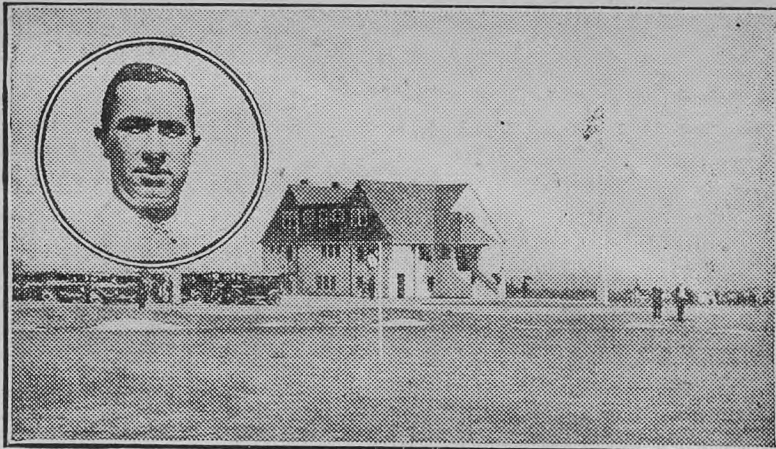

The Lord Shaughnessy championship challenge cup, emblematic of the highest honors in first aid work on Canadian Pacific lines, was for the second time carried to Eastern Canada, when the McAdam, N.B., first aid team won in competition October 13th against the Weston Shops of Winnipeg. The McAdam team won the right to meet the Weston Shops, who held the championship last year, when they won the Eastern lines championship competitions in Montreal on October 6th. McAdam carried the Shaughnessy Cup to the East for the first time in 1924.

Dr. Beatty, chief surgeon of the Canadian Pacific Railway, judged

the competitors in the recent competition. The examinations were made by E. G. Noble, instructor C. P. R. centre St. John Ambulance Association, Western lines, and A. F. Shakespeare, instructor on Eastern lines. The Shaughnessy Cup was presented to the winning team by Charles Murphy, general manager of Western lines, who complimented the eastern team for the excellent showing and the success that had attended their invasion of the west.

The members of the team from left to right: W. Gehan, C. Bogart, F. Sheehan, W. Bailey (captain of the team), A. Shakespeare, first aid instructor of the Canadian Pacific Railway, C. W. Lee and W. Dawson.

Canadian Course Lures Hagen

Langara Golf Course Club House. (Inset) Walter Hagen.

Walter Hagen, former British Open Golf Champion and winner for three years of the Professional Golf Association trophy, will soon be seen in action on the Canadian Pacific Railway Company's new course, Langara, situated at South Vancouver. Par for the course is 72 and Hagen is looking forward keenly to lowering the par figures. The Langara course, which is admittedly one of the finest public courses on the Pacific Coast, was built recently by the Canadian Pacific Railway Company at a cost of over \$160,000 and has an average length of 350 yards for each hole. One of the features of the course which has particularly excited Hagen's interest is the abnormal size of the greens, which measure in aggregate approximately five and one half acres.

Walter Steedman, golfing editor of the Seattle, Post Intelligencer, is expected to be present at the test and intends besides to review fully the various fine golf courses of Vancouver and Victoria.

Ottawa—The popular bicycle is still holding its own against motor cycle and flivver. A report of the Dominion Bureau of Statistics shows that Canadian bicycle factories in 1925 increased their output by 10 per cent. over 1924. The five Canadian firms making these "wheels" are all in Ontario.

A decision was reached at a meeting of the Directors of the Bureau of the Department of Railways, held recently, to undertake the construction of a submarine tunnel under the Shimonoseki-Moji Straits at an estimated cost of \$10,000,000. This will connect the Main Island of Japan with Kyushu, the Southern Island.

Alberta has one of the most wonderful wild game hinterland in North America, according to Adolph Muller, of Norristown, Pa., game commissioner of the State. He expressed this opinion after spending a month in the interior of the province,

exploring and taking motion pictures, including some of caribou on the trek.

Two brothers, George and Edward Hume, of Manor, Saskatchewan, carried off the Canadian Pacific Railway and the Dominion Livestock Board awards in the recent pig clubs competition conducted by the Extension Department of the University of Saskatchewan at Saskatoon. Teams from all parts of Saskatchewan competed.

Fredericton, New Brunswick—A moose with antlers spreading 64 inches was shot in the New Brunswick woods by William Proudfoot of Dobbs' Ferry, New York, while a companion of his, E. C. Chesbrough, of New York City, brought down a lordly animal with an antler spread of 57 inches. Mr. Proudfoot's trophy creates a record for the season.

PELICAN BRIEFS

(Too late for insertion in last weeks issue)

Pelican school was the scene of a very attractive and interesting program on Hallow Eve, Saturday, October 30th. The building was tastefully decorated and appropriately lit up for the occasion and the school house was early packed to capacity. To those modern skeptics and wiseacres who boastfully claim that witches and goblins no longer exist or else is mere legend which belongs to the ashean of antiquity and something to be discarded with the knee-breeches or pig-tail stage a rude shock was provided as eerie figures and ghosts aplenty appeared as if by magic from the enchanted wand of Miss Maitland. The cowering howls of timber wolves in the northland had nothing we fancy on these Hallow eve folk and your correspondent is unfeignedly thankful that he arrived home past the dim shadows of the school from town before the neighbourly bluffs became infested with Miss Maitland's terrestrial visitors else he would not now be writing this account. Fortunes were told for everybody and there is certainly no excuse for any Pelicanites being in ignorance of their future. As the sky was clouded there was no moon-shine. Black pointed hats gave the assemblage the appearance of a lodge convention. A delightful repast was served and then came the principal event of the evening which was a concert whose programme indicated much care and was admirably carried out by the pupils under the direction of their teacher.

Dialogue—Who's Scared?

Monologue—Hask Shagg's Hallowe'en Party.

Dialogue—Who's Afraid of Ghosts?

Monologue—Change of Mind
Cong—Hallowe'en Witches Test
Recitation—An Unfavourable Test.

Monologue—Soliloquy of a Ghost.

Good-by—By the Pupils.

The meeting closed with the singing of Auld Lang Syne, led by Prof. Warrington.

Mr. and Mrs. William Holland with family contemplate a visit to England for the Christmas Christmas holidays.

* * *

We were mighty glad to note

Tom Thorp among the Hallowe'en visitors the other night. We understand Tom may cross the briny deep to settle the miner's strike.

Insects have been on the earth for 50,000,000 years, while the human race is only 500,000 years old.
